Nicole Esther Lee

Singapore • +65 8127 5894 • nicoleestherlee@gmail.com • nicoleesther.github.io/design

Product designer who codes: I research, design and prototype, use AI to move faster, and test with real users.

EDUCATION

Singapore Institute of Technology – DigiPen Institute of Technology Singapore
Bachelor of Science in Computer Science in Interactive Media and Game Development *Aug 2023 – 2027 (expected)*

Millennia Institute Singapore
GCE A-Levels, including Art *Feb 2020 – Nov 2022*

DESIGN PROJECTS

Makan Kaki – Group Lunch-Ordering App Oct 2026
Figma variables, modes & components · iOS/Android

- Took a generic first draft to a local, kopitiam-inspired v3 after a design review, with English and shared Singlish copy so every colleague feels included
- Built 15 core components and tokens that re-skin the app into 5 visual styles without changing the layout, and logged every decision with its trade-off

Polished by Pris – TikTok Merchant Dashboard (Design Task) Jan – Oct 2026
Figma, Figma Make, Claude

- Graded my own v1, then rebuilt it with research, user flows with tap counts and a component-based design system
- Designed AI suggestions that explain why they appear and leave the final call to the seller

Tick – Design System for a Crypto Trading App Oct 2026
Figma, Figma AI

- Set the core rule, "separate value from intent", so price colours never clash with success and error colours across Light/Dark and Green-up/Red-up modes
- Let Figma's AI draft the first pass, then audited it and logged every defect (clipped variants, wrong totals, crossed order-book data) with before/after evidence

Nyx: Dreams of the Stray – 3D Narrative Level Jun 2025
Unreal Engine 5 · Grade A

- Ran 6 playtests across 3 builds; time played rose from 3:09 to 7:48 and falls in the hardest section dropped from 5 to 0

Game Engine Tools – Friends Frog-ever & Chroma Aug 2024 – Apr 2026
Custom C++ engines (school modules) · Windows & Android

- Treated 2 design students as my users and built a Unity-style level editor around their workflow, so they could build a game without engine code
- On Chroma, took on graphics, the level editor and particles beyond my physics role, and organised the 8-person team; credited as project manager

Also: Market Mayhem and Whispers of the Garden (Grade A card games); this portfolio, built with Claude Code

EXPERIENCE

DBS Bank Singapore
Site Reliability Engineer Intern, Global Financial Markets Technology *May 2026 – Present*

- Automate scheduled reports, job schedules and email alerts with Bash and Power Automate
- Run UAT before releases with development, operations and business teams, and monitor systems with the ELK stack

SKILLS

Design: User research, user flows, wireframing, prototyping, usability testing, design systems, Figma variables
AI tools: Claude, Claude Code, Figma AI, Figma Make; I review every AI output before it ships
Development: JavaScript, HTML, CSS, Vue.js, C++, Bash, Power Automate
