Nicole Esther Lee

Singapore • +65 8127 5894 • nicoleestherlee@gmail.com

Product designer and computer science student who designs with AI tools and tests with real users.

EDUCATION

Singapore Institute of Technology – DigiPen Institute of Technology Singapore
Bachelor of Science in Computer Science in Interactive Media and Game Development *Aug 2023 – 2027 (expected)*

Millennia Institute Singapore
GCE A-Levels, including Art *Feb 2020 – Nov 2022*

DESIGN PROJECTS

Tick – Design System for a Crypto Trading App Oct 2026
Figma, Figma AI

- Set the system's core rule, "separate value from intent", so price colours (up/down) are never confused with feedback colours (success/error) across Light/Dark and Green-up/Red-up market modes
- Specified three token layers, six core components and web/mobile templates; used Figma's AI agent for the first pass, then explored three visual directions
- Audited the AI output and found defects including clipped button variants, wrong buy/sell totals and crossed order-book data; directed the fixes and logged each with before/after screenshots

Nyx: Dreams of the Stray – 3D Narrative Level Jun 2025
Unreal Engine 5 · Grade A

- Ran 6 usability playtests across 3 builds, noting where players hesitated, got lost or wanted to quit, and fixed the biggest problems each round
- Time played rose from 3:09 to 7:48 and falls in the hardest section dropped from 5 to 0 after I simplified jumps and added respawns

Polished by Pris – Seller App for a Home-Based Nail Technician
Figma, Figma Make · High-fidelity prototype

- Designed one app for listings, coupons, client messages and livestream selling, around a persona: Pris, a nail technician with her own studio in Bedok

Level Editors for Friends Frog-ever & Chroma Aug 2024 – Apr 2026
C++ game engines · Level Editor Lead

- Treated design students as my users: gathered their workflow needs, then designed Unity-style editor tools around them (asset browser, entity/component panels, viewport gizmos)
- Worked cross-functionally as Level Editor Lead on Friends Frog-ever, turning designers' requests into features with the engine programmers; led the 8-person Chroma team

Also: Market Mayhem and Whispers of the Garden, two card games graded A

EXPERIENCE

DBS Bank Singapore
Site Reliability Engineer Intern, Global Financial Markets Technology *May 2026 – Present*

- Automate routine operations with Bash scripts and Power Automate, including scheduled report runs, job schedules and email alerts
- Run UAT before releases, and monitor systems with the ELK stack across Linux and AWS

SKILLS

Design: User flows, wireframing, interaction design, prototyping, usability testing, personas, design systems, Figma variables and modes

AI tools: Figma AI, Figma Make, Claude, DALL·E

Development: JavaScript, Vue.js, HTML, CSS, C++, Bash, Power Automate
