Nicole Esther Lee

Singapore • +65 8127 5894 • nicoleestherlee@gmail.com • nicoleesther.github.io/design • github.com/nicoleEsther

Designer who codes. I design interfaces, build them, and use AI to go faster, while checking every decision it makes.

EDUCATION

Singapore Institute of Technology – DigiPen Institute of Technology Singapore
Bachelor of Science in Computer Science in Interactive Media and Game Development *Aug 2023 – 2027 (expected)*

Millennia Institute Singapore
GCE A-Levels, including Art *Feb 2020 – Nov 2022*

PROJECTS

Personal Portfolio Website – nicoleesther.github.io Oct 2026
HTML, CSS, JavaScript · Designed and built with Claude Code

- Designed and shipped two versions of one portfolio (product design and marketing) from one shared design system
- Fixed image-viewer lag by profiling frame times, cutting average frame time from ~100 ms to ~19 ms
- Wrote a layout script that balances uneven card columns without cropping images, and an audit that checks spacing across every page

Tick – Design System for a Crypto Trading App Oct 2026
Figma, Figma AI · Design systems

- Set the core rule, "separate value from intent", so price colours never clash with error and success colours across Light/Dark and Green-up/Red-up market modes
- Directed Figma's AI agent for the first pass, then audited its output and logged every defect with before/after evidence (clipped variants, wrong totals, crossed order-book data)

Polished by Pris – AI-Assisted Seller App for a Home Nail Studio
Figma, Figma Make · Product design

- Designed AI suggestions people can trust: each one shows why it appeared (e.g. 3 of 6 Saturday slots booked) and the seller always makes the final call

Nyx: Dreams of the Stray – 3D Narrative Level Jun 2025
Unreal Engine 5 · Grade A

- Ran 6 playtests across 3 builds; time played rose from 3:09 to 7:48 and falls in the hardest section dropped from 5 to 0

Game Engine Tools – Friends Frog-ever & Chroma Aug 2024 – Apr 2026
Custom C++ engines · Windows & Android

- **Friends Frog-ever:** built the full Unity-style level editor (hierarchy, inspector, prefabs, in-editor Lua scripts, undo/redo) so 2 design students could build a 3D stealth game without engine code
- **Chroma:** joined as physics lead, then took on graphics, the level editor and particles when work stalled; organised the 8-person team's tasks and was credited as project manager

EXPERIENCE

DBS Bank Singapore
Site Reliability Engineer Intern, Global Financial Markets Technology *May 2026 – Present*

- Automate routine operations with Bash scripts and Power Automate, including scheduled report runs, job schedules and email alerts
- Run UAT before releases and monitor systems with the ELK stack across Linux and AWS

SKILLS

Design: Interaction design, prototyping, usability testing, design systems, Figma variables and modes
Code: JavaScript, HTML, CSS, Vue.js, C++, Bash, Power Automate, Git
AI: Claude Code, Claude, Figma AI, Figma Make; I log every AI output I accept or reject, and why
Also: Co-run Kiko's Café, a collectibles shop I grew on Instagram and Telegram; drawing, photography, piano
