Computer science student on a site reliability internship at DBS Bank, automating operations and monitoring for global markets technology.

EDUCATION

Singapore Institute of Technology – DigiPen Institute of Technology Singapore
Bachelor of Science in Computer Science in Interactive Media and Game Development *Aug 2023 – 2027 (expected)*

Millennia Institute Singapore
GCE A-Levels *Feb 2020 – Nov 2022*

EXPERIENCE

DBS Bank Singapore
Site Reliability Engineer Intern, Global Financial Markets Technology *May 2026 – Present*

- Automate operations with Bash/shell scripts and Power Automate, including scheduled report runs, job schedules and email alerts
- Automate monitoring and analyse logs with the ELK stack (Elasticsearch, Logstash, Kibana) to catch issues early
- Debug and improve existing scripts and systems across Linux and AWS environments
- Contribute to platform validation and application migration and replatforming work; run UAT before releases
- Work with development and infrastructure teams on issues and releases; this internship is also my university capstone project

PROJECTS

Friends Frog-ever (Ribbit Express) – 3D Game Engine for Android and Windows Aug 2025 – Apr 2026
C++ · Level Editor Lead

- Built a modular, Unity-style level editor with runtime component panels and an ImGuizmo scene viewport for real-time 3D editing
- Led the level editor, turning design students' requirements into features with the other engine programmers

Chroma – 2D Platformer Game Engine Aug 2024 – Apr 2025
C++ · Team Lead (8 people)

- Designed the core input system and built a physics system from scratch (gravity, collision detection)
- Led a team of 8, keeping engine work aligned with the design team's specifications

SKILLS

Languages: C++, C, Bash/Shell, JavaScript

Infrastructure & Ops: Linux, AWS, ELK Stack (Elasticsearch, Logstash, Kibana), monitoring and log analysis, Git/GitHub, UAT testing

Automation: Bash scripting, Power Automate, scheduled jobs and alerting
