Education

Singapore Institute of Technology – DigiPen Institute of Technology Singapore
Bachelor of Science in Computer Science in Interactive Media and Game Development *Aug 2023 – 2027 (expected)*

Millennia Institute Singapore
GCE A-Levels, including Art *Feb 2020 – Nov 2022*

Design Projects

Tick – Design System for a Crypto Trading App Oct 2026
Figma · Design systems

- Wrote the spec for a small trading design system: layered tokens (primitive, semantic, market) with Light/Dark and Green-up/Red-up modes, core and trading components (order book, buy/sell panel), and web and mobile templates
- Generated the first pass with Figma's AI agent, then audited the main components and token values rather than the documentation pages
- Found and logged defects such as clipped button variants, wrong buy/sell totals, crossed order-book data and a price-down colour clashing with error red; directed the fixes and documented each with before/after screenshots

Polished by Pris – Business Dashboard for Solopreneur Beauty Studios
Figma · Product & UX design, high-fidelity prototype

- Designed a dashboard that brings booking, listings and client messaging into one place for solo beauty businesses
- Grounded the design in a research-based persona: Pris, a nail technician running her own studio in Bedok
- Took the concept from desk research to high-fidelity screens in Figma

Level Editors for Ribbit Express & Chroma Aug 2024 – Apr 2026
C++ game engines · Level Editor Lead

- Worked with design students to identify their workflow needs, then designed Unity-style editor tools around them: asset browser, entity/component panels, viewport gizmos
- Bridged programmers and UX designers as level editor lead on Ribbit Express; led the 8-person Chroma team

Experience

DBS Bank Singapore
Site Reliability Engineer Intern, Global Financial Markets Technology *May 2026 – Present*

- Automate routine operations with Bash scripts and Power Automate, including scheduled report runs, job schedules and email alerts
- Run UAT testing before releases and monitor systems with the ELK stack across Linux and AWS

Skills

Design: Design systems and tokens, Figma variables, modes and component properties, user research, personas, user flows, high-fidelity prototyping

Development: JavaScript, Vue.js, HTML, CSS, C++, Bash, Power Automate

Collaboration: Jira, ClickUp, Notion; cross-functional team leadership, stakeholder communication
